

2018 CARDINAL TOUR

WHERE DOES MY ELECTRICITY COME FROM?

Join Firelands Electric Co-op for the 2018 tour of Cardinal Generating Station to find out!

Located on the Ohio River in Brilliant, Ohio, Buckeye Power's Cardinal Plant provides power to the 24 electric co-ops in Ohio. The plant has invested millions of dollars into environmental upgrades — making it one of the cleanest coal-fired power plants in the world.

The 2018 Cardinal Plant tour is scheduled to take place Wednesday, Sept. 12. This scenic, one day trip is free to cooperative members and includes an interesting and informative guided tour of the plant. The bus will depart from Firelands' office headquarters in New London and will also pick-up/drop-off at the Ashland County Career Center on State Route 60.

Since the power plant can be a potentially hazardous area, tour participants must be at least twelve (12) years old, unless specifically authorized. There will be a considerable amount of walking, several flights of stairs, and going through some hot and dusty areas. Members with health concerns, those who require assistance walking, or those who cannot walk more than a half mile without resting, should not take the tour.

If you are interested in attending this year's tour, and would like to request your seat(s) on the Cardinal tour bus, please contact the Member Services Dept. by email at members@firelandsec.com, or call 1-800-533-8658. Space is limited and seats are available on a first-come, first-served basis.

The Cardinal Plant tour is only offered to Firelands Electric Co-op members who have not previously toured the plant.

Please detach this lower portion and submit when you leave the meeting.

2018 CARDINAL PLANT TOUR R.S.V.P. FORM

Yes. I am interested in attending the 2018 Cardinal Plant tour. Please contact me with further information in August.
I am aware of the potential risks involved.
